ABOUT THE LAW AND REPORT

By Attorney General Jay Nixon

I am proud that Missouri is on the forefront of efforts to eliminate racial profiling, which has been defined as the inappropriate use of race when making a decision to stop, search, cite or arrest a person. To the extent that racial profiling occurs, it is an outdated practice that is not consistent with good police work, and it is a practice that is hurtful to a large portion of our population.

Racial profiling is not a visible problem to most white Americans; thus, there has been a tendency by the majority to ignore or dismiss these concerns expressed by African Americans and other people of color. Yet a national poll shows that 77 percent of African Americans believe racial profiling is pervasive. When law-abiding citizens -- including ministers, lawyers, teachers, students and even off-duty police officers -- believe they have been stopped simply because of their race, it focuses attention on a problem that we must address if we are to grow together as a community.

I commend the Missouri legislature for its efforts to address this issue, and I commend Missouri's law enforcement officers, who -- almost without exception -- have made an incredible good-faith effort to comply with this new law. Law enforcement, including the Office of the Attorney General, has undertaken this new challenge without additional funding and for the most part without a blueprint of how to proceed. Missouri is one of only 10 states -- including California, Connecticut, Kansas, Massachusetts, North Carolina, Oklahoma, Rhode Island, Tennessee and Washington -- with legislation that mandates data collection on this issue. Even the federal government and the Department

of Justice are only now considering such efforts.

The acceptance and implementation of this law has been greatly aided by the good counsel and advice of the 18-member Attorney General's Advisory Committee on Racial Profiling. The committee is composed of law enforcement leaders, minority community leaders and interested citizens.[1] The committee has demonstrated that people of good will, despite differing affiliations and views on an issue, can find common ground and learn from one another. I look forward to my continued work with them as we analyze the data presented and consider what steps lie ahead in the process.

Finally, it is important to remember that the vast majority of law enforcement works hard to do the right thing every day under challenging conditions and for little pay. The law enforcement leaders with whom I have worked have been eager and willing to implement this new law in an effort to ensure that good information is provided. Some agencies have gone the additional mile to gather even more data than required by law to ensure better service to their communities and better analysis of their data.

Peace officers in Missouri have been professional and responsible as they work to meet the considerable challenges of being one of the first states in the nation to implement a law of this nature. With their actions they have demonstrated an earnest desire to build trust in all communities and to provide equal justice under the law.

"Too many of our citizens have cause to doubt our nation's justice, when the law points a finger of suspicion at groups, instead of individuals. All our citizens are created equal and must be treated equally. .... It's [racial profiling] wrong and we will end it in America."
President George W. Bush,
State of the Union address, Feb. 27, 2001

I. BACKGROUND

Concerns by the citizens of Missouri and the Missouri legislature regarding allegations of racial profiling by law enforcement prompted the passage of state law Section 590.650, RSMo (2000), which was enacted Aug. 28, 2000. Racial profiling has been defined as the inappropriate use of race by law enforcement when making a decision to stop, search or arrest a motorist.

Missouri's new state law requires that all peace officers in the state report specific information including a driver's race for each traffic stop made in the state. Law enforcement agencies are required to turn in the data to the Attorney General, and the Attorney General is required to compile the data and report to the Governor no later than June 1 of each year. The law allows the Governor to withhold state funds for any agency which does not comply with the law. The information for this report includes data collected throughout the state from Aug. 28-Dec. 31, 2000, as required by law. Subsequent reports will include a full year of data, as required by law.

State law requires that all information be reported to the Attorney General's office by March 1. In an earlier letter to the Governor, Attorney General Jay Nixon listed the agencies that had not, for various reasons, complied with the law by failing to submit racial profiling data.

The summary of statewide racial profiling data has been provided by Scott H. Decker, Ph.D., Criminology and Criminal Justice, University of Missouri-St. Louis; Richard Rosenfeld, Ph.D., Criminology and Criminal Justice, University of Missouri-St. Louis; and Jack McDevitt, College of Criminal Justice, Northeastern University. The analysis of the data is provided by Attorney General Nixon, with consultation from law enforcement officials and community representatives from throughout Missouri and with professional statistical interpretation from Dr. Decker.

This report summarizes the data from more than 95 percent of law enforcement agencies in Missouri during a four-month period in 2000.

The agencies filing reports noted a total of 453,189 traffic stops, resulting in 31,906 searches and 23,716 arrests. Table 2 breaks out the stops, searches and arrests by race and ethnic group.

Table 2. 2000 statewide summary of results

Key Indicators	Total	White	Black	Hispanic	Asian	Am. Indian	Other
Population	4,167,519	3,600,107	433,672	75,962	59,603	43,010	41,086

Search rate	7.04%	6.34%	11.01%	12.96%	2.55%	8.71%	5.02%

Notes: Population data are for persons age 18 and older. Black, Asian, and American Indian include persons of mixed race. Asian includes Hawaiian and Pacific Islander. Other includes persons of unknown race. The census population figures include persons who designated a single racial classification plus those who designated more than one race. Therefore the population figures for the different racial groups exceed the statewide total and the percentages exceed 100%.

Disparity index = proportion of stops / proportion of population. A value of 1 represents no disparity. Values greater or less than 1 indicate over- and under-representation, respectively. For the state figures (used in this table) the disparity index is based on state population 18 and over. For individual agencies the disparity index is based on local population 18 and over.[3]

Search rate = (searches / stops) X 100.

Two summary indicators are included that may be useful in initiating further assessments of racial profiling in traffic stops.

The first, termed the "Disparity Index," relates each group's proportion of total traffic stops to its proportion of the population age 18 and older. (Data from the 2000 census for the driving age population were not available at the time this report was produced.) A value of 1 on this index indicates that a group's proportion of traffic stops equals its population proportion; it is neither "under-represented" nor "over-represented" in traffic stops. Values above 1 indicate over-representation, and those below 1 indicate under-representation. For example, the 377,852 whites who were stopped accounted for 83% of all traffic stops.

Table 2 indicates that whites comprise 86% of Missouri's adult population. The value for whites on the Disparity Index is, therefore .83 /.86, or .97.

Whites were stopped, in other words, at just slightly below the rate we would expect based on their fraction of the population.

The same is not the case for several of the other groups. African Americans represent 10.4% of the population 18 years and older, but 13.2% of all traffic stops, for a value on the Disparity Index of 1.27. African Americans were stopped at a rate 27% higher than expected based solely on their proportion of the population. Hispanics were stopped at a rate nearly equal to their population proportion, and Asians, American Indians, and persons of other or unknown race were stopped at a rate below their proportion of the population. The values on the Index for the different groups can be compared directly to one another. The likelihood that a black motorist was stopped is 1.3 times that of a white motorist (1.27/.97).

THE SECOND INDICATOR that can be used to begin assessing racial profiling is the "Search Rate," or the number of searches divided by the number of stops (x 100). The Search Rate for all motorists who were stopped is 7.04%. Whites, American Indians, and persons of other or unknown race were searched at rates close to the statewide average. (Searches include searches of drivers and of property in the vehicle.) Asians were searched at a rate well below the statewide average, and Blacks and Hispanics were searched at rates above the average for all motorists who were stopped. The search rate for the different groups also can be compared directly with one another. Blacks were 1.7 times more likely to be searched than whites (11.01/6.34). Hispanics were twice as likely as whites to be searched (12.96/6.34).

The Disparity Index is a gauge of the likelihood drivers of a given race or ethnic group are stopped based on their proportion of the adult residential population age 18 and over, and not of the population of motorists on the state's streets, roads, and highways. A group's share of the residential population age 18 and over may or may not equal its proportion of drivers. Although in most instances the two proportions should be close, that may not always be the case. The extremely low Index values for American Indians, for example, could indicate that they are under-represented among the state's motorists. In addition, motorists from other states are stopped on Missouri's roadways. To the extent that out-of-state drivers do not reflect the race and ethnic composition of Missouri's population, the Disparity Index will not accurately portray the probability that Missouri residents are stopped.

The Search Rate is subject to a somewhat different set of considerations. The reasons for conducting a search and the outcome of the search (i.e., discovery of contraband) should be considered when making comparisons across groups. Some searches are conducted with the consent of the driver, or because the officer observed suspected contraband in plain view, had reasonable suspicion that an individual may possess a weapon (Terry search), or other reasons. These searches may or may not result in an arrest. Other searches are conducted incident to arrest -- this means there is no other reason given for the search other than arrest. Searches are almost always performed when there is an outstanding warrant.

Table 2 includes all arrests resulting from traffic stops reported by the agencies. About 5% of all traffic stops resulted in an arrest (23,716/453,189). The probability of arrest varies across the groups. Approximately 9% of the stops of African Americans and Hispanics resulted in an arrest, compared with about 2% of the stops of Asians and 4.5% of those of whites. Although American Indians were stopped infrequently compared with the other groups, 40% of those stops resulted in an arrest. African Americans and Hispanics were stopped and searched more often than whites, but they were arrested more often as well.

III. ANALYSIS BY ATTORNEY GENERAL JAY NIXON

Missouri's new law regarding racial profiling was enacted in response to concerns that minorities are inappropriately targeted for traffic stops because of their race. The law directed each law enforcement agency to have a policy against racial profiling. The law was intended to help us learn if racial profiling is occurring in Missouri. This is the first statewide effort to collect data, and it is based on a four-month collection period.

It is worth noting that the collection of this data, its entry into computerized form and the analysis were all undertaken in response to a very short deadline. As this is the first effort on the part of the state to collect and analyze such data, this year's work should be regarded as a baseline measure. With that in mind, there are several findings that should be noted.

First, the data collected clearly show a disproportionate number of stops of African Americans as well as a disproportionate number of searches of African Americans and Hispanics. African Americans were stopped at a rate 27% higher than expected based solely on their proportion in the population. When compared to whites, they were stopped at a rate 30% higher, or they were 1.3 times as likely as whites to be stopped. African Americans were 1.7 times more likely to be searched than whites. Hispanics were twice as likely as whites to be

searched.

There is, however, a very real difference between disproportion in the data and racial profiling.

Many officers and police departments will point to a variety of important considerations that will affect their data. These include:

- Increased policing in high crime areas where minorities are often the victims, as well as the perpetrators of crimes. Patrol of "hot spot" areas is an appropriate response to the well-documented fact that crime, and especially violent crime, is heavily concentrated in certain geographic areas.
- The presence of interstate highways, large shopping centers or major employers affect the demographics of the driving population (as opposed to the resident population reported in the census) and will affect the proportionality of stops and arrests.

In addition, in many instances officers have very little discretion on whether to stop or search someone. A motorist exceeding the speed limit by 25 mph is far more likely to be pulled over than one going 2 mph over the limit. A motorist with an outstanding arrest warrant will, and should, be arrested and will, and should, be searched pursuant to that arrest. This is good police work and is important to the safety of the officer.

It also must be noted that for many stops an officer is not even aware of the driver's race until the officer approaches the car. This is particularly true on interstates after dark.

Regardless of the challenges of securing accurate data and the difficulty of analyzing the data once collected, the overall goal to prevent profiling solely on the basis of race is a worthy one. I acknowledge the limits of our information -- we are using a four-month study period and this is the first-ever attempt at data collection in Missouri and one of the first in the country. And, while data alone cannot prove racial profiling, the data collected in this initial study have done nothing to disprove the perception of racial profiling.

In my travels across the state since the enactment of Missouri's Racial Profiling law last August, numerous highly respected members of Missouri's minority community have told me of their personal experiences on our roadways. While anecdotes are not evidence, they do, at a minimum, convey people's perceptions. Anecdotal information, combined with levels of disproportion in the data, leads me to believe that African Americans and Hispanics have in certain instances been the target of racial profiling in Missouri. We in law enforcement must recognize this as a problem and work to eliminate it.

Our work toward that goal has already begun. The collection of statistics and information regarding law enforcement activities has and will continue to increase awareness of and sensitivity to the issue of racial profiling. The implementation of data collection sends a clear message to police and citizens that racial profiling is inconsistent with effective policy and equal protection. In addition, a policy on racial profiling must now be on file in every police department in Missouri. These are important steps in our goal of equal justice under the law.

In addition, the Missouri legislature this year passed new Peace Officers Standards and Training (POST) requirements stating that:

Peace officers who make traffic stops shall be required to receive annual training concerning the prohibition against racial profiling and such training shall promote understanding and respect for racial and cultural differences and the use of effective, non-combative methods for carrying out law enforcement duties in a racially and culturally diverse environment.

We need to do more. Internal analysis of the data by each agency and open dialogue with the community will improve community policing efforts and will help build trust of the police in the communities they serve. The data are useful in:

- Pointing out areas where improvements need to be made in our training of law enforcement officers. For example, these data show that non-white drivers are no more likely to be carrying contraband than are white drivers. Our officers, who may be carrying out their duties not intending to discriminate based on race, should be trained to no longer improperly consider a person's race in deciding whether or not to stop that person.
- Allowing our law enforcement agencies to more effectively supervise their officers on the streets. Thus, information gathered by law

enforcement agencies must be reviewed by those agencies, not just at the end of the reporting year, but periodically throughout the year.

- And, most of all, opening or facilitating better communication between our law enforcement agencies and the communities they serve, particularly our minority communities. It is only through such communication that perceptions -- both of law enforcement as well as our community members -- can be changed.

This report represents the valid and good faith attempt by law enforcement in Missouri, including the Office of the Attorney General, to comply with the requirements of Section 590.650 RSMo (2000). And while it is up to each jurisdiction in Missouri to determine what the results mean in individual communities, I am convinced Missouri must do a better job of providing equal justice under the law.

Accuracy verification statement for agency reports

The Attorney General's Office made extensive efforts to verify and correct all forms where numbers appeared incomplete or inaccurate. Following the March 1 deadline, calls were made to a number of agencies regarding incomplete or inaccurate data. To the extent that corrections could be determined, they were incorporated into the report.

In addition, all agencies were given the opportunity to review their final reports before publication and to make comments. At that point, corrections again were made for agencies and their comments have been included on individual city data sheets under the heading "Agency response."

The data verification process uncovered a difference in how various agencies reported and compiled arrest totals. The differing methods of compilation did not produce a significant statistical distinction and is not statistically relevant to the analysis.

Arnold is by far the largest city in the county and offers more employment, shopping and recreational opportunities than any other city in the county. Interstate 55 also runs through the center of the city and serves as a corridor for residents of the city of St. Louis and many adjoining cities that have a large minority population. Out of 1,912 vehicle stops, only 27 (1.4%) were black. Because of the above facts and the city's minute black population (.32%), the Disparity Index is not a true reflection of our proportion of stops to our population.

Agency response

Blue Springs is a diverse community of 48,080 residents on the east side of the Kansas City metropolitan area, with a minority population estimated at 8-10%. Interstate 70 dissects the city as a major thoroughfare from east Missouri to west Missouri. Thousands of vehicles travel through the city per day. Of the 1,893 vehicles stopped in the reporting period, 1,718 were driven by whites (90.7%); 1,155 were male (61%); and 796 were between the ages of 18-29 (42%). The number of searches were also consistent with the traffic stops by race, gender and age.

Agency response

The disparity index for Blacks in the report is not accurate based upon all the facts, and any characterization by way of inference that my department is discriminating is totally untrue. In support of our position we offer the following:According to the 2000 Census, our City's Afro American population of 18 year olds or older is 1.98% or 123 individuals.During the study period, the report indicated our department stopped 284 blacks, and since the study criteria is only based upon our City's Afro American population in relationship to the number stopped. That meant that every one of our citizens was stopped at least twice.When in fact our racial profiling reports clearly indicate that only a total of four of our Afro American citizens were stopped by four different officers on four different occasions.Based upon this fact alone, its our opinion that the Afro American population figures of our City cannot be used solely without further consideration to determine if minorities are receiving disparity treatment. The City of Brentwood is located 3 miles west of the City of St. Louis and 2 miles south of Clayton, the county seat. The City's static population is approximately 7,693; however, it swells to approximately 31,000 during the daytime, which is due to 750 business establishments, large shopping centers and an industrial park. The City is also the major crossroads between the

county seat and the City of St. Louis. Major highways and county arterial roads in the City are some of the most heavily traveled commuter routes in the metropolitan area.We believe these facts must be taken into account before any conclusions or inferences can be drawn from this racial profiling report, and ask that our response be included with your report.

Agency response

Bridgeton has an extremely diverse business community with many large corporate employers, retail businesses and entertainment centers, located along side of an International Airport with two major interstate highways and two heavily traveled state highways. I feel that these factors account for the high disparity index.

Agency response

I find this reported summary, which is actually an attempt at analysis, to have the same mentality as the law itself; that is, if we can't get it quite right, we'll proceed anyway.Driving age figures are not yet available, so you have proceeded anyway with the percentages and figures as if they were factual when they are not based on the population total or the driving age total. You should have stayed with the total population figures or waited for the correct driving figures.As to our specific jurisdiction, we are home to several large, labor-intensive businesses that employ as many as 70% Hispanic workers. No one believes that the 2000 census counted anywhere near all of the undocumented population here. I firmly believe that the Hispanic population is two or three times what the census has reported.I presume that you have noticed that the searches themselves are, in some population groups, almost entirely in the "incident to arrest" category, an excellent indication that vehicle stops are not a pretext to search.I realize the AGO did not ask for this task. However, you have not made it better.

The following are conditions that may impact our minority contacts:(1) Chesterfield Mall — a major shopping mall, located on 86 acres in the center of Chesterfield, has four major department stores and 140 smaller stores comprising 1.5 million square feet of shopping area.(2) Spirit of St. Louis Airport — The largest reliever airport in the state is also the second busiest in the state, and is within Chesterfield city limits.(3) 13 miles of Interstate 64/U.S. Highway 40 run through the city, virtually splitting the city into a north and south area.

Agency response

The Village of Claycomo is home to a Ford Motor Company assembly plant. The company has about 5,000 employees. The assembly plant is located on 69 Highway, which runs through the city. The racial makeup of these employees is vastly different from the local population percentage.In addition, the Village of Claycomo is surrounded by two major interstate highways, I-35 and I-435. These are heavily traveled routes, which leads to officers contacting many drivers who are not residents of this city, and therefore not reflected in the local population percentage.

The City of Clayton is the county seat for St. Louis County. It contains the courts, government offices, juvenile detention center and the St. Louis County Justice Center, which houses over 1,200 inmates. In addition, Clayton is the home of several major corporations and contains over 6.5 million square feet of office space and one million square feet of retail. It is estimated that over 80,000 people visit Clayton on a daily basis to work, shop, or do business. Most of those visiting Clayton reside in the St. Louis metropolitan area. Additionally, a number of major thoroughfares run through Clayton carrying commuters from various parts of the county requiring a significant amount of traffic enforcement: I-170, Forest Park Parkway, Hanley Road, Clayton Road, Brentwood Boulevard and Forsyth Boulevard.Therefore, it is felt that, for the purposes of this study, the racial makeup of the population should be in direct proportion to that of the St. Louis metropolitan area. At the very least, the racial breakdown should be in line with that of St. Louis County as a whole, rather than the resident population of Clayton.

Clinton is located on the primary roadway carrying traffic from the large metropolitan areas of Kansas City and Springfield. In addition, Clinton receives a large influx of tourists due to its proximity to Truman Lake. Together, these factors result in a large transient population which may provide a different base population level. Additionally, some of these figures are so small that their statistical significance would be questionable.

Agency response

The City of Creve Coeur is a “crossroads” in the St. Louis metropolitan area, having five major Interstate and State highways that pass through or are immediately adjacent to the city. Creve Coeur is home to numerous employers and businesses that hire and draw customers from throughout the region. While the disparity index may be perceived or at face value appear out of balance, the racial makeup of the region is a more reflective breakdown of motorists traveling within the City of Creve Coeur. The Afro-American population of St. Louis County is 19% and within Creve Coeur it is only 3.6%. Due to the large number of persons of all races and ethnicity that work, travel, and do business within our city, the racial makeup of motorists in Creve Coeur is reflective of a composite of the more racially diverse St. Louis County and St. Louis City region.The greater diversity of our city is also reflected in the daytime or workday population of Creve Coeur, which reaches upwards of 200,000 compared to the approximately 19,000 residents. In addition to the daytime population, Creve Coeur is ranked fifth in St. Louis County and seventeenth overall in the State for the number of traffic crashes. Two citizen surveys in the last five years reflect “traffic” as the #1 problem in the community. Police Department statistics show that 89% of traffic tickets written in year 2000 were issued to non-

resident drivers, thus indicating the largest percentage of motorists stopped is also more reflective of the general metropolitan area. The disparity index while appearing out of balance when considering only the resident population is very reflective of and in line with the population of the St. Louis metropolitan area.

Agency response

The population of Diamond is predominantly white. We are aware of only one Hispanic family and one Asian family. If the department stops more than two or three persons from these groups, then we are over-represented in the disparity index. The main road through the town is 59 Highway. This road is one of the few direct routes between Dallas and Chicago. There also is an elevated population of Hispanic individuals in the two towns directly to the north and south of us. There is a larger number of Hispanic individuals operating motor vehicles between Carthage and Neosho who travel through our town via 59 Highway, which is the only through highway that interconnects the two towns. Normally when police officers deal with individuals of different ethnic groups, their dispatchers only want to know if the person is black or white, due to the operations of the MULES terminals. Therefore literally if it is not appararent to officers what the nationality of a person is, then most officers would mark the white box as is untrue in this department. Our officers were instructed to mark the unknown race box when unsure.

Agency response

The population at the last census is 848. We have Interstate 70 which runs through Edmundson along with state highway 115, and are located across the street (I-70) from Lambert International Airport, which produces a large amount of traffic. We also have two hotels and the second largest rent a car company in the United States, Avis Rent a Car. All these factors produce traffic not associated with our population, which I understand affects our data in all areas of racial profiling.

Agency response

The City of Festus has a major interstate highway (I-55) that runs through the middle of our city. This interstate, which runs from Louisiana all the way up to Chicago, is traveled by several thousand people a day from different nationalities. We also have Rte. A that travels east and west that brings a lot of people into our area. Our city also has a Super Wal-Mart store that is visited by several people that are out of the area. It is the only Wal-Mart of its size in our county. Our city also has a wide variety of restaurants that are patronized by people who are traveling all of our thoroughfares.

Agency response

Upon reviewing the data, I found that the numbers presented are generally consistent with information already compiled by our agency, in terms of total number of traffic stops, citations, warnings, locations, etc. However, I am concerned with the area of the report which reflects the population percentages of the various races who reside in our city. I specifically call your attention to the population percentages used to formulate the disparity index, which reflects that African-Americans are over-represented in total traffic stops made by officers of our department.While these percentages of the population probably accurately reflect African-Americans residing within our city limits, it unfortunately fails to account for the many others who spend time each day in our community. The City of Florissant, like many other similar cities, is not a self-contained community and offers many amenities to our citizens and North St. Louis County and St. Louis City neighbors. The city is home to numerous business districts, shopping centers, department stores, supermarkets and specialty stores, all of which serve residents of the entire area. Additionally, numerous arterial roadways, such as county, state and even a portion of interstate highway service the city and provide access and travel routes for our citizens and neighbors. According to our statistics, it is these roadways

where the majority of our traffic stops occur.The City of Florissant prides itself as a culturally diverse community made up of vastly larger populations of minorities who use city services each day and are not accounted for in the official figures. The higher ratio of visiting population is due to significantly higher percentages of African-American citizens living in every one of our adjacent communities. These include the City of Berkeley (76.4%), the City of Black Jack (71.2%), the City of Dellwood (58.2%), the City of Ferguson (52.3%), the City of Hazelwood (16%), the City of Kinloch (95.8%), and Spanish Lake (54.5%), to name just a few.I would ask that you please consider this information prior to releasing the final report so that percentages are accurately conveyed to the public so that we may continue forging strong relationships within the community, especially with our minority citizens.

Editor’s note: The Gladstone Department of Public Safety noted several statistical errors when it reviewed the original report. Those changes were duly reported to the statistical team, and the final report reflects those changes. Because of the statutory deadline of this report, however, the Gladstone Department of Public Safety did not have the opportunity for a final review of those statistics.)

Glendale is a bedroom community with five major streets. Manchester Road (State Route 100) is an east-west thoroughfare in St. Louis County and City. Berry Road connects with Interstate 44 half a mile south of town. Sappington Road connects with Crestwood Mall 2½ miles south. Lockwood Boulevard and Kirkham Avenue carry commuters through our town. Beside Crestwood Mall, there are three other malls within a five-mile radius. West County Mall to the west on Manchester; Frontenac Plaza to the northwest and the Galleria to the northeast. The City of Warson Woods is to our north, and they have a large shopping area which can only be reached by traveling through our town. Although our population is small, it is not an indicator of the number of vehicles that pass through our town on a daily basis. With regards to race, we have three neighboring cities with a larger black population: Rock Hill, Kirkwood and Webster Groves.

Agency response

The information contained within this report indicates that the “Disparity Index” for stopping blacks in Grain Valley is 2.37, which indicates over-representation.It should be noted that of the 667 stops made by Grain Valley Police for the period being reported, there were only 8 blacks stopped. This equates to 1.2% of the total stops made; however, because of the number of blacks stopped and the small local population of blacks in Grain Valley (.51%), the “Disparity Index” calculation results in an over-inflated number.Additionally, Grain Valley has Interstate 70 that runs through the community with east and west bound exit ramps into Grain Valley where large numbers of motorists stop because of the three service stations/truck stops that are located adjacent to the interstate. Also, Grain Valley is located within the metroplex of Kansas City, the largest city in the State of Missouri, that has a relatively large black population.In conclusion, I don’t believe from the “Disparity Index” one can conclude Grain Valley police are targeting blacks as indicated by the raw numbers versus the Index figures.

Agency response

Our disparity index is very low, but we continue to strive for non-profiling, professional and random car stops on all traffic violations.

Agency response

The above report indicates that the disparity index of 2.82 for black and 2.77 for Asian can be attributed to stops on U.S. Hwy. 54 that runs through Holts Summit. U.S. Hwy. 54 is a major corridor for travelers from St. Louis to Jefferson City and Lake of the Ozarks

Agency response

Comparing the traffic stop data with the resident population of a given political subdivision is meaningless. Comparing traffic stop data with the racial, gender and age breakdown of drivers actually on the road within that subdivision, if such information were actually available, would be the proper way to proceed.The Montgomery County, Maryland, Police Department has accomplished racial, gender and age data of drivers through their signal light photo enforcement of signal light violators. If Missouri approves photo enforcement, we would willingly assist in accomplishing this type of data gathering for the state.

Agency response

The report prepared by the Attorney General's Office may provide an incomplete picture of traffic stop activities by the Joplin Police Department and other Missouri law enforcement agencies, by comparing individual agency traffic stop data against local jurisdiction demographics collected in the 2000 census. For those agencies whose officers are likely to encounter a high proportion of non-residents traveling through their jurisdiction, demographics of the driving population could be significantly different from the demographics of the agency's resident population. A 1999 study for the City of Joplin, performed by the consulting firm Bucher, Willis and Ratliff Corporation of Kansas City, indicated that 28% of the vehicles entering Joplin each day are registered outside the state of Missouri, and that more than 7 of every 8 vehicles entering Joplin each day are garaged outside the city of Joplin. The presence of large employment, retail, commercial and medical sites within Joplin results in a daily service population in excess of 225,000, five times greater than the resident population. Until valid data on the demographics of "the population of minority groups residing or traveling within the jurisdiction" are generated, comparisons of traffic stop data to local resident population demographics could easily lead to erroneous conclusions about law enforcement activities.When the traffic stop data

reported by the Joplin Police Department are compared to statewide population, as mandated by the statute (Section 590.650, RSMo), instead of to local population, the “Disparity Index” calculation results in a very different picture than that contained in the table presented by the Attorney General’s Office. When compared to statewide population data, the Joplin Police Department’s “Disparity Index” results are: White - 1.09, Black - .33, Hispanic - 1.09, Asian - .22, American Indian - .18, Other - .24.

Agency response

The arrest figures combine data from two separate areas in the Annual Report to the Attorney General. This combined number may inflate the number of arrests since drivers arrested for a traffic violation may also be listed as an arrest with regard to a search. Second, the population figures used to determine the population percentage and the disparity index only includes drivers ages 18 and over. However, KCPD traffic stop figures include drivers of all ages. Many drivers stopped by this department are 16 and 17 years old. In addition, we also make numerous stops of unlicensed drivers who are younger than 16. We recommend that the disparity index be calculated using all drivers stopped.

Interstate 35 runs through the center of Kearney with exits onto Mo. 92 where a large, high-volume truck stop is located. State highways 33 and 92 intersect in Kearney city limits just east of I-35. Within a five-mile radius of the city limits of Kearney are a large number of subdivisions that have a population of more than 18,000 people. Most of these people use the Mo. 33, Mo. 92 and I-35 routes on a daily basis.

Agency response

The statistics appear to be representative of the area as well as the calls for service and citizen concerns. A large commercial development opened late fall/early winter in the area of Interstate 44 and U.S. 61-67, one mile east of Interstate 270. The development included large discount department stores, retail stores, fast food and restaurants. The influx of traffic to the new development was a major adjustment for the city. In conjunction with the new development, many residents were relocated during the construction phase and subsequent housing efforts. This relocation effort created a high percentage of these residents returning to the area to visit, attend neighborhood, church and family functions.Many of the car stops in the neighborhood/residential areas are in response to resident complaints and concerns regarding suspected drug activity, alcohol and gambling violations. This would be relevant when considering the high number of searches incident to arrest.

Agency response

Ladue and its Police Department are dedicated to the equal and non-discriminatory enforcement of the law. The statistical “analysis” contained in the report is an improper basis for its calculations because it only uses the racial makeup of the population of Ladue and ignores the proper benchmark, the racial makeup of the motoring public driving in and through Ladue. Ladue has four major thoroughfares — Interstate 64, Interstate 170, Clayton Road and Ladue Road — that carry over 300,000 vehicles a day through the city. Most police encounters with motorists result from investigating accidents and enforcing traffic laws on these major roadways. A racial population analysis has not been performed of the drivers on these roads. Common sense indicates that this ratio would be more reflective of the racial composition of St. Louis County which, for example, shows an African-American minority population of 19% compared to Ladue’s 0.87%. If a proper basis for the study’s “analysis” were to be used, it would obvious that our department is fulfilling its mission of equal and non-discriminatory enforcement of the law.

Agency response

Lake Lotawana is a city in Jackson County, a first class county, with a population in excess of 660,000. Mo. Hwy. 7, a main thoroughfare between U.S. Hwy. 50 and Interstate 70, intersects our city on its west boundary. It is utilized by thousands of vehicles per day, and the only subjects stopped are those committing traffic violations through this corridor. At the time the vehicle is observed committing a violation, the ethnicity of the occupants is not known, especially at night time.

Agency response

One critical consideration in the analysis of the data submitted by the City of Lake Saint Louis is the fact that Interstate 70 borders the venue on the north and U.S. Highway 40/61 passes through the municipality near its southern border. For example, it should be noted that 61.5% of the traffic stops initiated where the driver was black occurred on the Interstate and 14.8% occurred on a U.S. Highway. Out of 122 traffic stops where the subject was black, only 10 occurred on City streets. The information on stops and searches is being compared to the local population percentages, but the majority of the stops involving black drivers were not conducted on City streets. While the City has a relatively low minority population, that is not necessarily the case for the population traveling the highways.A critical consideration in evaluating search rate is the fact that no distinction is made regarding the reason a search was initiated. For example, in the case of searches conducted on black drivers, 10 searches took place out of 122 driver encounters. While this may appear statistically high, it should be noted that 7 of those searches took place incident to arrest. The practice of searching individuals who are placed under arrest is required not only for officer safety, but also to secure and safeguard the property of the individual being arrested. The arrests made in

these 7 incidents were made on outstanding warrants.

Agency response

The City of Lee’s Summit is a suburban community of a larger metropolitan area, which enjoys a diverse population. The population of people involved in traffic stops is more representative of the metropolitan area than the city population. Lee’s Summit Police share responsibility for an interstate highway and two major state highways, and employs people from the metropolitan area. The demographic of the traveling public is likely different than the resident population.

Agency response

According to your report, the City of Linn showed a disparity for two groups. Blacks received a disparity index of 1.97. Hispanics had a disparity index of 2.96. At face value, there might appear to be a problem. However, out of 87 stops, only one Black motorist was stopped and only two Hispanics. Due to the fact that these minority groups are under-represented in the local population, .58% and .78% respectively, any one member of such a group would represent a disparity if stopped. As you may know, U.S. 50 traverses the length of the City of Linn. This highway is often used as an alternate to I-70 for persons traveling to Kansas City and St. Louis, and as such, Linn receives a large amount of transient, non-local traffic that does not necessarily reflect the local population's makeup. In addition, there are several minority students who attend Linn State Technical College who were apparently not represented in your agency's local population percentage figure.To use such figures to show an apparent "disparity" would be an unjust application of statistics. To be labeled a problem department because of three traffic stops that were initiated after officers had developed probable cause to believe a traffic violation had occurred would be simply ludicrous. Yet an uninformed person could draw the conclusion that such a problem exists. Such statistics show the inherent weakness

in the current format in which racial profiling data are compiled. In addition to interstate highways and local colleges where the student body's composition may not be taken into account other factors are likewise ignored. When utilizing moving radar at night it is impossible to tell the race of the driver, not only because it's dark, but also because you're blinded by oncoming traffic's headlights. However, the form suggested by your office for compiling data does not contain a space for the time of stop. Failing to look at the big picture will subject law enforcement officers to unjust and undeserving scrutiny.

Agency response

The Disparity Index of 1.54 in black motorists would appear to be flawed, or at least not an accurate representation. A check of our 50 traffic stops show only 1 of 50 black motorists cited, or ".02%" resides within our boundaries. Yet, as I understand it, the City of Manchester's population figures are used for these calculations. It seems to me, that perhaps a regional, or even a state-wide population would be more representative for all, be it white, black, Hispanic, Asian, American Indian or other. Also, only 19 or "1.6%" of the total 1,184 white motorists cited reside within our city. Other than the 1 black, no other races reside within our community. Therefore, 20 of the 1,280 motorists cited or "1.56%" reside in the City of Manchester. I am not trying to be flippant, but unless you have a captive population so to speak, such as the former Eastern Berlin communist countries, too many variables enter into the end product that this report endeavors to take into account to make it truly meaningful. Our community of 19,161 (2000 census) has 2 major state highways, i.e. 100 and 141, that some 100,000 cars pass along daily. With over 60 municipalities alone, within St. Louis County, in addition to St. Louis City, and unincorporated St. Louis County in our metro area, I am sure nearly all are represented by motorists who travel this route on a daily basis.Again, it is not clear what population

figure should be applied, but using a given community’s population as the basis, appears to skew the end interpretation result.

Agency response

Mexico, not unlike other cities in Missouri, experiences frequent non-permanent movement of persons from other communities. The cities of Moberly, Fulton and Columbia are all within 50 miles of Mexico, and inhabitants of Mexico have many ties to others in these communities. This has been the experience of our officers for many years in their contacts with the public. Clearly, one of the most basic flaws in this system is considering only the permanent population to establish a disparity index. While this index may reflect a very slight over representation, we do not believe that it is sufficient to establish a racial profiling concern

Milan has two food production plants. Con Agra and Premium Standard Foods. Both employ about 30% Hispanics. This population is continually leaving and others are arriving to work. Many are not making an effort to abide by city ordinances

U.S. highway 160 and state highway 14 intersect inside our city. A large portion of our traffic includes major north/south (Springfield to Branson) and east/west bound traffic. We also have a Wal Mart Super Center inside our city limits which attracts a large amount of traffic

Agency response

It is significant that our community is located adjacent to an Interstate Highway with a major shopping mall and that nine of these non-white stops occurred on a state highway.It is obvious that ten non-white stops and one non-white search cannot be statistically or otherwise significant of any factors regarding racial profiling.This law has been so successful that I would propose that the members of the General Assembly also track data concerning their contacts with local constituents to ensure that racial profiling is not occurring.

The City of Osage Beach is in the heart of the Lake of the Ozarks recreation area. The 110 stores of the Factory Outlet Village mall also makes the city a regional shopping destination. The population expands from 3,075 year-round to well over 50,000 on the weekends, especially during the summer vacation season and fall shopping season. This influx explains the disparity between the local population and the drivers contacted and included in the racial profiling report for August 28, 2000 to December 31, 2000.

There are two state highways that traverse most of the city. These highways link Parkville to Kansas City, Missouri and Kansas City, Kansas. The minority populations of these cities are significantly greater than either the minority population of Parkville or the state average. Parkville also has a university with a large minority enrollment most of who are not residents

Agency response

It should be noted that Platte City has a high volume of transient traffic not related to our city population. The I-29/92 highway corridor brings in many cars at all times of the day and night. 10,000 cars a day use 92 highway through Platte City

Platte County is located in the northwest corner of the Kansas City, Missouri metropolitan area and has been ranked as one of the fastest growing counties in Missouri. With a total population of over 70,000 people, a large portion of southern Platte County is densely populated and falls within the city limits of Kansas City, while the northern portion of the county is more rural and is largely agricultural. Because of this agricultural base, Platte County has experienced an increase in the number of migrant workers traveling in and out of the county for employment purposes. In addition, Platte County hosts three separate interstate highway systems; I-29, I-435 and I-635, all of which serve as main thoroughfares to and from the Kansas City International Airport, which is located directly in the middle of Platte County. Platte County is bordered on the north by Buchanan County, to the west by Leavenworth County, Kansas and Kansas City, Kansas, to the south by Jackson County and to the east by Clay County.

Agency response

Erroneous number of arrests for Blacks recorded by AG's Office. 7 Blacks were arrested instead of 11. Of the 7 arrested, only one was a Raymore resident. Raymore has the only 24-hour Wal-Mart Super Center in the region, which serves Belton, Grandview and parts of south Kansas City, which have more racially diverse populations.

Agency response

Our city has several excellent resources that attract diverse populations of people to our city. We have one of the highest rated school systems in the area; 4-A rated. The boundaries extend beyond Raytown city limits into Kansas City, Missouri. We have several major highways and thoroughfares that run through our city. We are a hub for government services including a state run license bureau, a driver's license testing station, a county tax office, a public library and a U.S. government post office. We have a Wal-Mart store that serves several census tracts extending into Kansas City, Missouri. We have two major chain grocery stores on our borders. We have a multi-national corporation headquarters in our city. In addition to these factors several of my employees and I have been to sensitivity training, to diversity training, and to the Kansas City Mayor's Summit on Race Relations. In addition, I have scheduled meetings with minority community leaders.

Riverside has a major High School with approximately a 2,000 student body the city also has a riverboat casino, a major interstate highway (I-635), which is a major highway from Kansas to KCI Airport. Riverside also has a major four lane state highway, M-9, from North Kansas City to Parkville, Missouri. Riverside has three large industrial parks which all have large businesses e.g. Riverside Seat Co., Woodbridge Foam, AT&T etc. Riverside west city limits is also the Missouri/Kansas state line and the Kansas county which is on the state line has a large black and Hispanic population. The Riverside Red X store is a large general store with some of the lowest cigarette and liquor prices in the area and draws a lot of Kansas residents to the area. Riverside is also one of the few cities in the area that allows the sale and discharge of fireworks, which draws persons from outside the Riverside area. It is estimated that Riverside’s daytime population is in excess of 10,000 persons because of all the above mentioned areas.

Agency response

The Springfield Police Department does not condone any detention, interdiction, or other disparate treatment of any person on the basis of racial or ethnic status. The department is interested in any accurate and statistically valid means to measure racial profiling that might occur in the City of Springfield. The department is disturbed by the figures submitted to the Office of Attorney General but realizes there may be mitigating factors that have not been considered in this raw data report.As a result of the findings of this report, the Springfield Police Department is reviewing policy, training, deployment and further analysis of police operations as it relates to issues of disparity in traffic stop practices. The Springfield Police Department implemented a policy condemning and prohibiting the practice of racial profiling nine months prior to the passage of SB 1053 and we will ensure this policy and procedure exemplifies the best professional police practices. The Springfield Police Department provides significant academy training in cultural diversity issues and is expanding that training to provide specific instruction on avoidance of racial profiling practices. The City of Springfield has created a Police Citizen Appeal Board for the purpose of reviewing appeals of internal affairs cases by complaints. The Board will also address appeals of racial profiling incidents

investigated by the department.

Agency response

As reflected in the report, 56% of traffic stops were made on a state highway, known as highway 180 or St. Charles Rock Road. This is the main street through St. John which is a direct link from St. Louis City, Wellston and Pagedale (predominately minority populated) and the Northwest Plaza Shopping Mall and other grocery stores. These are the first available shopping malls west of the city limits, which increases the amount of minority traffic who traverse the street.

Agency response

While the number of persons stopped by police was fairly proportional by race, a greater percentage of black persons were searched by police (537, or 9.55% of those stopped) as compared to white persons (125, or 2.34% of those stopped.) A closer examination of the data concerning “probable cause/authority to search” reflects that the percentage of blacks searched for various reasons was higher than the rate for whites (e.g. the number of blacks consenting to a search (176) was greater than the number of whites consenting (47); also, the number of blacks searched incidental to arrest (255) was greater that the number of whites (45). This correlates to the number of those arrested for outstanding warrants (n: blacks: 281; whites 40). The first audit of the racial profiling data covered only a four month period. We will continue to closely monitor and analyze the data as it is collected.

Agency response

While the data compiled in this report is informative, any conclusions drawn from the data must be tempered with common sense. For example, population data used to calculate the disparity index does not include members of the minority community that reside in the City of St. Louis and therefore, increases the diversity of drivers on the roads within St. Louis County. Nor does the data reflect that in a majority of traffic stops, police officers do not know the race of the driver prior to initiating the traffic stop. The St. Louis County Police Department. has a long standing policy prohibiting all investigative detentions, traffic stops, arrests, searches or seizures of property based solely on race, ethnicity, gender, sexual orientation, religious belief, disability or economic level. All commissioned officers have participated in cultural diversity and sensitivity training and specialized training which prohibits the illegal practice of racial profiling. The St. Louis County Police Department will continue to gather and monitor the data required in this report to ensure our officers continue to respect the rights of every individual.

Agency response

The demographics of the driving population are impacted by the only large shopping mall in the county and the presence of Interstate 70 traversing the city. Additionally, state road 94 South impacts the driving demographics and will skew the data from the census data

St. Robert shares a common border with a large military installation, Ft. Leonard Wood. With the population of this city and that of Ft. Leonard Wood, St. Robert experiences an approximate traffic population of 25,000 people during the daytime.Within these circumstances are the accommodations available to those individuals who visit St. Robert and Ft. Leonard Wood as the fort is a training installation, with graduations on most Thursdays of the year.

Agency response

This police department during this time period was operating under a state grant to reduce fatal and serious injury accidents on a major highway in our city. As such, most of the traffic stops reflected in this report took place on that highway. It is very heavily traveled and the percentage of minorities traveling on that highway is in no way related to the minority population of this city. In addition, we sit between two major cities, Independence and Kansas City, Missouri, and receive traffic from both.

Three major highways, two federal and one state, crisscross the City of Town and Country. These highways carry an estimated 400,000 plus vehicles through our community daily. The intersection of I-64 and I-270 is reported to be the second busiest intersection in the state. Traffic crashes and other highway incidents account for a significant amount of personal injury and economic loss occurring within our jurisdiction and as well as a considerable amount of the police department's workload and focus.The city's police department is committed to making these highways, and the many other roadways within its jurisdiction, safe for all citizens. Analysis shows that the overwhelming majority of the department's traffic enforcement occurs on these three major highway systems.Often, the city's residential population is in the minority in comparison to others traveling through, visiting, worshiping or working within its boundaries.Additional analysis indicates that the overwhelming majority of traffic citations are issued to non-residents.It can be reasonably concluded that the racial makeup of those utilizing these highways is more proportionate to a combination of state, county and St. Louis City population and associated ratios than to the City of Town and Country proper.It is therefore our belief that the city's police department activities are in harmony with both

the provisions and intent of the State's Racial Profiling Law requiring that vehicle stops be proportionate to the population groups residing or traveling within the jurisdiction of the law enforcement agency.

The City of Warson Woods is primarily a residential community, however, Warson Woods has a large shopping district which is visited daily by thousands of customers. Leading into this shopping district is a major highway, (highway 100/Manchester Road.) Due to the daily volume being considerably more than the actual population of Warson Woods, one would expect that the Warson Woods disparity index would be higher that the arbitrary figure of one, that has been established.

Agency response

The City of Webster Groves is part of a major metropolitan area whose population travels daily upon our streets. A major interstate highway and several north/south feeder streets are included in our traffic network and are heavily traveled by non-residents in their commute to work and business. In addition, Webster Groves has several shopping and recreational areas that are heavily patronized by a large number of non-residents. This transient population is well documented in that the overwhelming majority of traffic warnings and citations are in fact issued to non-residents. Consequently, any statistical model wherein the resident population of the City of Webster Groves is the sole population used for analysis is seriously flawed.

Agency response

Wentzville has two major Interstate Highways traversing its community. Interstate 70 and Interstate40/61 (64) are heavily traveled and provide a transit population driving, working and shopping within the community. Also, within the city limits are two major employers, the General Motors Wentzville Truck Plant employing 2,695 people consisting of 853 minorities, and the Verizon Communications Company, which is a major employer hosting a large percentage of minority workers. Several other smaller companies with minority employee populations operate within the city and add considerably to the traffic population totals. Blvd style feeder roads such as the Wentzville Parkway, state Route A, Pitman Avenue and other local roads such as state route Z and Mexico Road provide high traffic volumes and traffic violation offenders which demand a considerable police traffic safety response.

ANNUAL REPORT OVERVIEW

A new state law, Section 590.650 RSMo (2000), puts Missouri on the forefront in addressing the issue of racial profiling, which is defined as the inappropriate targeting of drivers by their race. This law requires each law enforcement agency in the state to record data concerning the race of every driver involved in a traffic stop, search or arrest.

That information is submitted to the Attorney General's Office on an annual basis, then compiled in a report that is presented to the Governor and the General Assembly by June 1.

The 2000 Annual Report on Missouri traffic stops includes information from 634 law enforcement agencies reporting information on 453,189 stops from Aug. 28 (when the law took effect) through Dec. 31. The statewide data indicate that African Americans were stopped at a rate 27 percent higher than expected based solely on their proportion of the population, and when compared with whites, African American drivers were stopped at a rate 30 percent higher than whites. The numbers were compared using a standard of measure called the Disparity Index.

"The information does nothing to disprove the perception of racial profiling," Attorney General Jay Nixon said. "Anecdotal information, combined with levels of disproportion in the data, leads me to believe that African Americans and Hispanics have, in certain instances, been the target of racial profiling in Missouri."

Nixon also noted, however, that he could not make that same judgment for any specific city.

"Disproportion in the numbers does not necessarily reflect racial profiling," Nixon said. "There are numerous extenuating circumstances that affect disproportion. Each law enforcement agency must use the data to determine its context locally and as a means of opening dialog on this important issue."

Notes: Proportion of stops by racial category/proportion of statewide population of that racial category. A value of 1 indicates local stops within a racial category equivalent to that racial groups proportion in the state population. A value less than 1.0 indicates a lower proportion of stops of that racial group lower than its proportion in the state population. A value greater than 1.0 indicates a higher proportion of that racial group than its proportion of the statewide population.

#Error indicates zero in denominator.

Arnold is by far the largest city in the county and offers more employment, shopping and recreational opportunities than any other city in the county. Interstate 55 also runs through the center of the city and serves as a corridor for residents of the city of St. Louis and many adjoining cities that have a large minority population. Out of 1,912 vehicle stops, only 27 (1.4%) were black. Because of the above facts and the city's minute black population (.32%), the Disparity Index is not a true reflection of our proportion of stops to our population.

Blue Springs is a diverse community of 48,080 residents on the east side of the Kansas City metropolitan area, with a minority population estimated at 8-10%. Interstate 70 dissects the city as a major thoroughfare from east Missouri to west Missouri. Thousands of vehicles travel through the city per day. Of the 1,893 vehicles stopped in the reporting period, 1,718 were driven by whites (90.7%); 1,155 were male (61%); and 796 were between the ages of 18-29 (42%). The number of searches were also consistent with the traffic stops by race, gender and age.

Agency response

The disparity index for Blacks in the report is not accurate based upon all the facts, and any characterization by way of inference that my department is discriminating is totally untrue. In support of our position we offer the following:According to the 2000 Census, our City's Afro American population of 18 year olds or older is 1.98% or 123 individuals.During the study period, the report indicated our department stopped 284 blacks, and since the study criteria is only based upon our City's Afro American population in relationship to the number stopped. That meant that every one of our citizens was stopped at least twice.When in fact our racial profiling reports clearly indicate that only a total of four of our Afro American citizens were stopped by four different officers on four different occasions.Based upon this fact alone, its our opinion that the Afro American population figures of our City cannot be used solely without further consideration to determine if minorities are receiving disparity treatment. The City of Brentwood is located 3 miles west of the City of St. Louis and 2 miles south of Clayton, the county seat. The City's static population is approximately 7,693; however, it swells to approximately 31,000 during the daytime, which is due to 750 business establishments, large shopping centers and an industrial park. The City is also the major crossroads between the

county seat and the City of St. Louis. Major highways and county arterial roads in the City are some of the most heavily traveled commuter routes in the metropolitan area.We believe these facts must be taken into account before any conclusions or inferences can be drawn from this racial profiling report, and ask that our response be included with your report.

Agency response

Bridgeton has an extremely diverse business community with many large corporate employers, retail businesses and entertainment centers, located along side of an International Airport with two major interstate highways and two heavily traveled state highways. I feel that these factors account for the high disparity index.

Agency response

I find this reported summary, which is actually an attempt at analysis, to have the same mentality as the law itself; that is, if we can't get it quite right, we'll proceed anyway.Driving age figures are not yet available, so you have proceeded anyway with the percentages and figures as if they were factual when they are not based on the population total or the driving age total. You should have stayed with the total population figures or waited for the correct driving figures.As to our specific jurisdiction, we are home to several large, labor-intensive businesses that employ as many as 70% Hispanic workers. No one believes that the 2000 census counted anywhere near all of the undocumented population here. I firmly believe that the Hispanic population is two or three times what the census has reported.I presume that you have noticed that the searches themselves are, in some population groups, almost entirely in the "incident to arrest" category, an excellent indication that vehicle stops are not a pretext to search.I realize the AGO did not ask for this task. However, you have not made it better.

Agency response

The following are conditions that may impact our minority contacts:(1) Chesterfield Mall — a major shopping mall, located on 86 acres in the center of Chesterfield, has four major department stores and 140 smaller stores comprising 1.5 million square feet of shopping area.(2) Spirit of St. Louis Airport — The largest reliever airport in the state is also the second busiest in the state, and is within Chesterfield city limits.(3) 13 miles of Interstate 64/U.S. Highway 40 run through the city, virtually splitting the city into a north and south area.

Agency response

The Village of Claycomo is home to a Ford Motor Company assembly plant. The company has about 5,000 employees. The assembly plant is located on 69 Highway, which runs through the city. The racial makeup of these employees is vastly different from the local population percentage.In addition, the Village of Claycomo is surrounded by two major interstate highways, I-35 and I-435. These are heavily traveled routes, which leads to officers contacting many drivers who are not residents of this city, and therefore not reflected in the local population percentage.

Agency response

The City of Clayton is the county seat for St. Louis County. It contains the courts, government offices, juvenile detention center and the St. Louis County Justice Center, which houses over 1,200 inmates. In addition, Clayton is the home of several major corporations and contains over 6.5 million square feet of office space and one million square feet of retail. It is estimated that over 80,000 people visit Clayton on a daily basis to work, shop, or do business. Most of those visiting Clayton reside in the St. Louis metropolitan area. Additionally, a number of major thoroughfares run through Clayton carrying commuters from various parts of the county requiring a significant amount of traffic enforcement: I-170, Forest Park Parkway, Hanley Road, Clayton Road, Brentwood Boulevard and Forsyth Boulevard.Therefore, it is felt that, for the purposes of this study, the racial makeup of the population should be in direct proportion to that of the St. Louis metropolitan area. At the very least, the racial breakdown should be in line with that of St. Louis County as a whole, rather than the resident population of Clayton.

Agency response

Clinton is located on the primary roadway carrying traffic from the large metropolitan areas of Kansas City and Springfield. In addition, Clinton receives a large influx of tourists due to its proximity to Truman Lake. Together, these factors result in a large transient population which may provide a different base population level. Additionally, some of these figures are so small that their statistical significance would be questionable.

Agency response

The City of Creve Coeur is a “crossroads” in the St. Louis metropolitan area, having five major Interstate and State highways that pass through or are immediately adjacent to the city. Creve Coeur is home to numerous employers and businesses that hire and draw customers from throughout the region. While the disparity index may be perceived or at face value appear out of balance, the racial makeup of the region is a more reflective breakdown of motorists traveling within the City of Creve Coeur. The Afro-American population of St. Louis County is 19% and within Creve Coeur it is only 3.6%. Due to the large number of persons of all races and ethnicity that work, travel, and do business within our city, the racial makeup of motorists in Creve Coeur is reflective of a composite of the more racially diverse St. Louis County and St. Louis City region.The greater diversity of our city is also reflected in the daytime or workday population of Creve Coeur, which reaches upwards of 200,000 compared to the approximately 19,000 residents. In addition to the daytime population, Creve Coeur is ranked fifth in St. Louis County and seventeenth overall in the State for the number of traffic crashes. Two citizen surveys in the last five years reflect “traffic” as the #1 problem in the community. Police Department statistics show that 89% of traffic tickets written in year 2000 were issued to non-

resident drivers, thus indicating the largest percentage of motorists stopped is also more reflective of the general metropolitan area. The disparity index while appearing out of balance when considering only the resident population is very reflective of and in line with the population of the St. Louis metropolitan area.

Agency response

The population of Diamond is predominantly white. We are aware of only one Hispanic family and one Asian family. If the department stops more than two or three persons from these groups, then we are over-represented in the disparity index. The main road through the town is 59 Highway. This road is one of the few direct routes between Dallas and Chicago. There also is an elevated population of Hispanic individuals in the two towns directly to the north and south of us. There is a larger number of Hispanic individuals operating motor vehicles between Carthage and Neosho who travel through our town via 59 Highway, which is the only through highway that interconnects the two towns. Normally when police officers deal with individuals of different ethnic groups, their dispatchers only want to know if the person is black or white, due to the operations of the MULES terminals. Therefore literally if it is not appararent to officers what the nationality of a person is, then most officers would mark the white box as is untrue in this department. Our officers were instructed to mark the unknown race box when unsure.

Agency response

The population at the last census is 848. We have Interstate 70 which runs through Edmundson along with state highway 115, and are located across the street (I-70) from Lambert International Airport, which produces a large amount of traffic. We also have two hotels and the second largest rent a car company in the United States, Avis Rent a Car. All these factors produce traffic not associated with our population, which I understand affects our data in all areas of racial profiling.

Agency response

The City of Festus has a major interstate highway (I-55) that runs through the middle of our city. This interstate, which runs from Louisiana all the way up to Chicago, is traveled by several thousand people a day from different nationalities. We also have Rte. A that travels east and west that brings a lot of people into our area. Our city also has a Super Wal-Mart store that is visited by several people that are out of the area. It is the only Wal-Mart of its size in our county. Our city also has a wide variety of restaurants that are patronized by people who are traveling all of our thoroughfares.

Agency response

Upon reviewing the data, I found that the numbers presented are generally consistent with information already compiled by our agency, in terms of total number of traffic stops, citations, warnings, locations, etc. However, I am concerned with the area of the report which reflects the population percentages of the various races who reside in our city. I specifically call your attention to the population percentages used to formulate the disparity index, which reflects that African-Americans are over-represented in total traffic stops made by officers of our department.While these percentages of the population probably accurately reflect African-Americans residing within our city limits, it unfortunately fails to account for the many others who spend time each day in our community. The City of Florissant, like many other similar cities, is not a self-contained community and offers many amenities to our citizens and North St. Louis County and St. Louis City neighbors. The city is home to numerous business districts, shopping centers, department stores, supermarkets and specialty stores, all of which serve residents of the entire area. Additionally, numerous arterial roadways, such as county, state and even a portion of interstate highway service the city and provide access and travel routes for our citizens and neighbors. According to our statistics, it is these roadways

where the majority of our traffic stops occur.The City of Florissant prides itself as a culturally diverse community made up of vastly larger populations of minorities who use city services each day and are not accounted for in the official figures. The higher ratio of visiting population is due to significantly higher percentages of African-American citizens living in every one of our adjacent communities. These include the City of Berkeley (76.4%), the City of Black Jack (71.2%), the City of Dellwood (58.2%), the City of Ferguson (52.3%), the City of Hazelwood (16%), the City of Kinloch (95.8%), and Spanish Lake (54.5%), to name just a few.I would ask that you please consider this information prior to releasing the final report so that percentages are accurately conveyed to the public so that we may continue forging strong relationships within the community, especially with our minority citizens.

Editor's note: The Gladstone Department of Public Safety noted several statistical errors when it reviewed the original report. Those changes were duly reported to the statistical team, and the final report reflects those changes. Because of the statutory deadline of this report, however, the Gladstone Department of Public Safety did not have the opportunity for a final review of those statistics.)

Agency response

Glendale is a bedroom community with five major streets. Manchester Road (State Route 100) is an east-west thoroughfare in St. Louis County and City. Berry Road connects with Interstate 44 half a mile south of town. Sappington Road connects with Crestwood Mall 2½ miles south. Lockwood Boulevard and Kirkham Avenue carry commuters through our town. Beside Crestwood Mall, there are three other malls within a five-mile radius. West County Mall to the west on Manchester; Frontenac Plaza to the northwest and the Galleria to the northeast. The City of Warson Woods is to our north, and they have a large shopping area which can only be reached by traveling through our town. Although our population is small, it is not an indicator of the number of vehicles that pass through our town on a daily basis. With regards to race, we have three neighboring cities with a larger black population: Rock Hill, Kirkwood and Webster Groves.

Agency response

Comparing the traffic stop data with the resident population of a given political subdivision is meaningless. Comparing traffic stop data with the racial, gender and age breakdown of drivers actually on the road within that subdivision, if such information were actually available, would be the proper way to proceed.The Montgomery County, Maryland, Police Department has accomplished racial, gender and age data of drivers through their signal light photo enforcement of signal light violators. If Missouri approves photo enforcement, we would willingly assist in accomplishing this type of data gathering for the state.

Agency response

The report prepared by the Attorney General's Office may provide an incomplete picture of traffic stop activities by the Joplin Police Department and other Missouri law enforcement agencies, by comparing individual agency traffic stop data against local jurisdiction demographics collected in the 2000 census. For those agencies whose officers are likely to encounter a high proportion of non-residents traveling through their jurisdiction, demographics of the driving population could be significantly different from the demographics of the agency's resident population. A 1999 study for the City of Joplin, performed by the consulting firm Bucher, Willis and Ratliff Corporation of Kansas City, indicated that 28% of the vehicles entering Joplin each day are registered outside the state of Missouri, and that more than 7 of every 8 vehicles entering Joplin each day are garaged outside the city of Joplin. The presence of large employment, retail, commercial and medical sites within Joplin results in a daily service population in excess of 225,000, five times greater than the resident population. Until valid data on the demographics of "the population of minority groups residing or traveling within the jurisdiction" are generated, comparisons of traffic stop data to local resident population demographics could easily lead to erroneous conclusions about law enforcement activities.When the traffic stop data

reported by the Joplin Police Department are compared to statewide population, as mandated by the statute (Section 590.650, RSMo), instead of to local population, the “Disparity Index” calculation results in a very different picture than that contained in the table presented by the Attorney General’s Office. When compared to statewide population data, the Joplin Police Department’s “Disparity Index” results are: White - 1.09, Black - .33, Hispanic - 1.09, Asian - .22, American Indian - .18, Other - .24.

Agency response

The arrest figures combine data from two separate areas in the Annual Report to the Attorney General. This combined number may inflate the number of arrests since drivers arrested for a traffic violation may also be listed as an arrest with regard to a search. Second, the population figures used to determine the population percentage and the disparity index only includes drivers ages 18 and over. However, KCPD traffic stop figures include drivers of all ages. Many drivers stopped by this department are 16 and 17 years old. In addition, we also make numerous stops of unlicensed drivers who are younger than 16. We recommend that the disparity index be calculated using all drivers stopped.

Agency response

Interstate 35 runs through the center of Kearney with exits onto Mo. 92 where a large, high-volume truck stop is located. State highways 33 and 92 intersect in Kearney city limits just east of I-35. Within a five-mile radius of the city limits of Kearney are a large number of subdivisions that have a population of more than 18,000 people. Most of these people use the Mo. 33, Mo. 92 and I-35 routes on a daily basis.

Agency response

The statistics appear to be representative of the area as well as the calls for service and citizen concerns. A large commercial development opened late fall/early winter in the area of Interstate 44 and U.S. 61-67, one mile east of Interstate 270. The development included large discount department stores, retail stores, fast food and restaurants. The influx of traffic to the new development was a major adjustment for the city. In conjunction with the new development, many residents were relocated during the construction phase and subsequent housing efforts. This relocation effort created a high percentage of these residents returning to the area to visit, attend neighborhood, church and family functions.Many of the car stops in the neighborhood/residential areas are in response to resident complaints and concerns regarding suspected drug activity, alcohol and gambling violations. This would be relevant when considering the high number of searches incident to arrest.

Agency response

Ladue and its Police Department are dedicated to the equal and non-discriminatory enforcement of the law. The statistical “analysis” contained in the report is an improper basis for its calculations because it only uses the racial makeup of the population of Ladue and ignores the proper benchmark, the racial makeup of the motoring public driving in and through Ladue. Ladue has four major thoroughfares — Interstate 64, Interstate 170, Clayton Road and Ladue Road — that carry over 300,000 vehicles a day through the city. Most police encounters with motorists result from investigating accidents and enforcing traffic laws on these major roadways. A racial population analysis has not been performed of the drivers on these roads. Common sense indicates that this ratio would be more reflective of the racial composition of St. Louis County which, for example, shows an African-American minority population of 19% compared to Ladue’s 0.87%. If a proper basis for the study’s “analysis” were to be used, it would obvious that our department is fulfilling its mission of equal and non-discriminatory enforcement of the law.

Agency response

(1) Lafayette County has a major interstate highway (I-70) crossing our County; therefore, some of our traffic stops are not of our population.(2) Lafayette County has a large transient farm worker population during the fall, as our County is a major supplier to the apple industry.(3) Lafayette County has two major truck stop/travel centers located on I-70.(4) Lafayette County has a large outlet mall located on I-70.

Agency response

Lake Lotawana is a city in Jackson County, a first class county, with a population in excess of 660,000. Mo. Hwy. 7, a main thoroughfare between U.S. Hwy. 50 and Interstate 70, intersects our city on its west boundary. It is utilized by thousands of vehicles per day, and the only subjects stopped are those committing traffic violations through this corridor. At the time the vehicle is observed committing a violation, the ethnicity of the occupants is not known, especially at night time.

Agency response

One critical consideration in the analysis of the data submitted by the City of Lake Saint Louis is the fact that Interstate 70 borders the venue on the north and U.S. Highway 40/61 passes through the municipality near its southern border. For example, it should be noted that 61.5% of the traffic stops initiated where the driver was black occurred on the Interstate and 14.8% occurred on a U.S. Highway. Out of 122 traffic stops where the subject was black, only 10 occurred on City streets. The information on stops and searches is being compared to the local population percentages, but the majority of the stops involving black drivers were not conducted on City streets. While the City has a relatively low minority population, that is not necessarily the case for the population traveling the highways.A critical consideration in evaluating search rate is the fact that no distinction is made regarding the reason a search was initiated. For example, in the case of searches conducted on black drivers, 10 searches took place out of 122 driver encounters. While this may appear statistically high, it should be noted that 7 of those searches took place incident to arrest. The practice of searching individuals who are placed under arrest is required not only for officer safety, but also to secure and safeguard the property of the individual being arrested. The arrests made in

these 7 incidents were made on outstanding warrants.

Agency response

The City of Lee’s Summit is a suburban community of a larger metropolitan area, which enjoys a diverse population. The population of people involved in traffic stops is more representative of the metropolitan area than the city population. Lee’s Summit Police share responsibility for an interstate highway and two major state highways, and employs people from the metropolitan area. The demographic of the traveling public is likely different than the resident population.

Agency response

According to your report, the City of Linn showed a disparity for two groups. Blacks received a disparity index of 1.97. Hispanics had a disparity index of 2.96. At face value, there might appear to be a problem. However, out of 87 stops, only one Black motorist was stopped and only two Hispanics. Due to the fact that these minority groups are under-represented in the local population, .58% and .78% respectively, any one member of such a group would represent a disparity if stopped. As you may know, U.S. 50 traverses the length of the City of Linn. This highway is often used as an alternate to I-70 for persons traveling to Kansas City and St. Louis, and as such, Linn receives a large amount of transient, non-local traffic that does not necessarily reflect the local population's makeup. In addition, there are several minority students who attend Linn State Technical College who were apparently not represented in your agency's local population percentage figure.To use such figures to show an apparent "disparity" would be an unjust application of statistics. To be labeled a problem department because of three traffic stops that were initiated after officers had developed probable cause to believe a traffic violation had occurred would be simply ludicrous. Yet an uninformed person could draw the conclusion that such a problem exists. Such statistics show the inherent weakness

in the current format in which racial profiling data are compiled. In addition to interstate highways and local colleges where the student body's composition may not be taken into account other factors are likewise ignored. When utilizing moving radar at night it is impossible to tell the race of the driver, not only because it's dark, but also because you're blinded by oncoming traffic's headlights. However, the form suggested by your office for compiling data does not contain a space for the time of stop. Failing to look at the big picture will subject law enforcement officers to unjust and undeserving scrutiny.

Agency response

The Disparity Index of 1.54 in black motorists would appear to be flawed, or at least not an accurate representation. A check of our 50 traffic stops show only 1 of 50 black motorists cited, or ".02%" resides within our boundaries. Yet, as I understand it, the City of Manchester's population figures are used for these calculations. It seems to me, that perhaps a regional, or even a state-wide population would be more representative for all, be it white, black, Hispanic, Asian, American Indian or other. Also, only 19 or "1.6%" of the total 1,184 white motorists cited reside within our city. Other than the 1 black, no other races reside within our community. Therefore, 20 of the 1,280 motorists cited or "1.56%" reside in the City of Manchester. I am not trying to be flippant, but unless you have a captive population so to speak, such as the former Eastern Berlin communist countries, too many variables enter into the end product that this report endeavors to take into account to make it truly meaningful. Our community of 19,161 (2000 census) has 2 major state highways, i.e. 100 and 141, that some 100,000 cars pass along daily. With over 60 municipalities alone, within St. Louis County, in addition to St. Louis City, and unincorporated St. Louis County in our metro area, I am sure nearly all are represented by motorists who travel this route on a daily basis.Again, it is not clear what population

figure should be applied, but using a given community's population as the basis, appears to skew the end interpretation result.

Agency response

Mexico, not unlike other cities in Missouri, experiences frequent non-permanent movement of persons from other communities. The cities of Moberly, Fulton and Columbia are all within 50 miles of Mexico, and inhabitants of Mexico have many ties to others in these communities. This has been the experience of our officers for many years in their contacts with the public. Clearly, one of the most basic flaws in this system is considering only the permanent population to establish a disparity index. While this index may reflect a very slight over representation, we do not believe that it is sufficient to establish a racial profiling concern

Milan has two food production plants. Con Agra and Premium Standard Foods. Both employ about 30% Hispanics. This population is continually leaving and others are arriving to work. Many are not making an effort to abide by city ordinances

U.S. highway 160 and state highway 14 intersect inside our city. A large portion of our traffic includes major north/south (Springfield to Branson) and east/west bound traffic. We also have a Wal Mart Super Center inside our city limits which attracts a large amount of traffic

Agency response

It is significant that our community is located adjacent to an Interstate Highway with a major shopping mall and that nine of these non-white stops occurred on a state highway.It is obvious that ten non-white stops and one non-white search cannot be statistically or otherwise significant of any factors regarding racial profiling.This law has been so successful that I would propose that the members of the General Assembly also track data concerning their contacts with local constituents to ensure that racial profiling is not occurring.

The City of Osage Beach is in the heart of the Lake of the Ozarks recreation area. The 110 stores of the Factory Outlet Village mall also makes the city a regional shopping destination. The population expands from 3,075 year-round to well over 50,000 on the weekends, especially during the summer vacation season and fall shopping season. This influx explains the disparity between the local population and the drivers contacted and included in the racial profiling report for August 28, 2000 to December 31, 2000.

Agency response

There are two state highways that traverse most of the city. These highways link Parkville to Kansas City, Missouri and Kansas City, Kansas. The minority populations of these cities are significantly greater than either the minority population of Parkville or the state average. Parkville also has a university with a large minority enrollment most of who are not residents

Agency response

It should be noted that Platte City has a high volume of transient traffic not related to our city population. The I-29/92 highway corridor brings in many cars at all times of the day and night. 10,000 cars a day use 92 highway through Platte City

Agency response

Platte County is located in the northwest corner of the Kansas City, Missouri metropolitan area and has been ranked as one of the fastest growing counties in Missouri. With a total population of over 70,000 people, a large portion of southern Platte County is densely populated and falls within the city limits of Kansas City, while the northern portion of the county is more rural and is largely agricultural. Because of this agricultural base, Platte County has experienced an increase in the number of migrant workers traveling in and out of the county for employment purposes. In addition, Platte County hosts three separate interstate highway systems; I-29, I-435 and I-635, all of which serve as main thoroughfares to and from the Kansas City International Airport, which is located directly in the middle of Platte County. Platte County is bordered on the north by Buchanan County, to the west by Leavenworth County, Kansas and Kansas City, Kansas, to the south by Jackson County and to the east by Clay County.

Agency response

Erroneous number of arrests for Blacks recorded by AG's Office. 7 Blacks were arrested instead of 11. Of the 7 arrested, only one was a Raymore resident. Raymore has the only 24-hour Wal-Mart Super Center in the region, which serves Belton, Grandview and parts of south Kansas City, which have more racially diverse populations.

Agency response

Our city has several excellent resources that attract diverse populations of people to our city. We have one of the highest rated school systems in the area; 4-A rated. The boundaries extend beyond Raytown city limits into Kansas City, Missouri. We have several major highways and thoroughfares that run through our city. We are a hub for government services including a state run license bureau, a driver's license testing station, a county tax office, a public library and a U.S. government post office. We have a Wal-Mart store that serves several census tracts extending into Kansas City, Missouri. We have two major chain grocery stores on our borders. We have a multi-national corporation headquarters in our city. In addition to these factors several of my employees and I have been to sensitivity training, to diversity training, and to the Kansas City Mayor's Summit on Race Relations. In addition, I have scheduled meetings with minority community leaders.

Riverside has a major High School with approximately a 2,000 student body the city also has a riverboat casino, a major interstate highway (I-635), which is a major highway from Kansas to KCI Airport. Riverside also has a major four lane state highway, M-9, from North Kansas City to Parkville, Missouri. Riverside has three large industrial parks which all have large businesses e.g. Riverside Seat Co., Woodbridge Foam, AT&T etc. Riverside west city limits is also the Missouri/Kansas state line and the Kansas county which is on the state line has a large black and Hispanic population. The Riverside Red X store is a large general store with some of the lowest cigarette and liquor prices in the area and draws a lot of Kansas residents to the area. Riverside is also one of the few cities in the area that allows the sale and discharge of fireworks, which draws persons from outside the Riverside area. It is estimated that Riverside's daytime population is in excess of 10,000 persons because of all the above mentioned areas.

Agency response

The Springfield Police Department does not condone any detention, interdiction, or other disparate treatment of any person on the basis of racial or ethnic status. The department is interested in any accurate and statistically valid means to measure racial profiling that might occur in the City of Springfield. The department is disturbed by the figures submitted to the Office of Attorney General but realizes there may be mitigating factors that have not been considered in this raw data report.As a result of the findings of this report, the Springfield Police Department is reviewing policy, training, deployment and further analysis of police operations as it relates to issues of disparity in traffic stop practices. The Springfield Police Department implemented a policy condemning and prohibiting the practice of racial profiling nine months prior to the passage of SB 1053 and we will ensure this policy and procedure exemplifies the best professional police practices. The Springfield Police Department provides significant academy training in cultural diversity issues and is expanding that training to provide specific instruction on avoidance of racial profiling practices. The City of Springfield has created a Police Citizen Appeal Board for the purpose of reviewing appeals of internal affairs cases by complaints. The Board will also address appeals of racial profiling incidents

investigated by the department.

Agency response

As reflected in the report, 56% of traffic stops were made on a state highway, known as highway 180 or St. Charles Rock Road. This is the main street through St. John which is a direct link from St. Louis City, Wellston and Pagedale (predominately minority populated) and the Northwest Plaza Shopping Mall and other grocery stores. These are the first available shopping malls west of the city limits, which increases the amount of minority traffic who traverse the street.

Population figures are for those who are 18 years of age and older. Figures are from the 2000 Census (driving-age figures are not yet available).

Black, Asian, and American Indian includes persons of mixed race. Other race includes unknown race.

The disparity index = proportion of stops / proportion of population. A value of 1 represents no disparity; values greater than 1 indicate over-representation.

Search rate = (searches / stops) X 100. #Error indicates zero denominator.

Agency response

While the number of persons stopped by police was fairly proportional by race, a greater percentage of black persons were searched by police (537, or 9.55% of those stopped) as compared to white persons (125, or 2.34% of those stopped.) A closer examination of the data concerning “probable cause/authority to search” reflects that the percentage of blacks searched for various reasons was higher than the rate for whites (e.g. the number of blacks consenting to a search (176) was greater than the number of whites consenting (47); also, the number of blacks searched incidental to arrest (255) was greater that the number of whites (45). This correlates to the number of those arrested for outstanding warrants (n: blacks: 281; whites 40). The first audit of the racial profiling data covered only a four month period. We will continue to closely monitor and analyze the data as it is collected.

Agency response

While the data compiled in this report is informative, any conclusions drawn from the data must be tempered with common sense. For example, population data used to calculate the disparity index does not include members of the minority community that reside in the City of St. Louis and therefore, increases the diversity of drivers on the roads within St. Louis County. Nor does the data reflect that in a majority of traffic stops, police officers do not know the race of the driver prior to initiating the traffic stop. The St. Louis County Police Department. has a long standing policy prohibiting all investigative detentions, traffic stops, arrests, searches or seizures of property based solely on race, ethnicity, gender, sexual orientation, religious belief, disability or economic level. All commissioned officers have participated in cultural diversity and sensitivity training and specialized training which prohibits the illegal practice of racial profiling. The St. Louis County Police Department will continue to gather and monitor the data required in this report to ensure our officers continue to respect the rights of every individual.

Agency response

The demographics of the driving population are impacted by the only large shopping mall in the county and the presence of Interstate 70 traversing the city. Additionally, state road 94 South impacts the driving demographics and will skew the data from the census data

St. Robert shares a common border with a large military installation, Ft. Leonard Wood. With the population of this city and that of Ft. Leonard Wood, St. Robert experiences an approximate traffic population of 25,000 people during the daytime.Within these circumstances are the accommodations available to those individuals who visit St. Robert and Ft. Leonard Wood as the fort is a training installation, with graduations on most Thursdays of the year.

Agency response

This police department during this time period was operating under a state grant to reduce fatal and serious injury accidents on a major highway in our city. As such, most of the traffic stops reflected in this report took place on that highway. It is very heavily traveled and the percentage of minorities traveling on that highway is in no way related to the minority population of this city. In addition, we sit between two major cities, Independence and Kansas City, Missouri, and receive traffic from both.

Agency response

Three major highways, two federal and one state, crisscross the City of Town and Country. These highways carry an estimated 400,000 plus vehicles through our community daily. The intersection of I-64 and I-270 is reported to be the second busiest intersection in the state. Traffic crashes and other highway incidents account for a significant amount of personal injury and economic loss occurring within our jurisdiction and as well as a considerable amount of the police department's workload and focus.The city's police department is committed to making these highways, and the many other roadways within its jurisdiction, safe for all citizens. Analysis shows that the overwhelming majority of the department's traffic enforcement occurs on these three major highway systems.Often, the city's residential population is in the minority in comparison to others traveling through, visiting, worshiping or working within its boundaries.Additional analysis indicates that the overwhelming majority of traffic citations are issued to non-residents.It can be reasonably concluded that the racial makeup of those utilizing these highways is more proportionate to a combination of state, county and St. Louis City population and associated ratios than to the City of Town and Country proper.It is therefore our belief that the city's police department activities are in harmony with both

the provisions and intent of the State's Racial Profiling Law requiring that vehicle stops be proportionate to the population groups residing or traveling within the jurisdiction of the law enforcement agency.

Agency response

The City of Warson Woods is primarily a residential community, however, Warson Woods has a large shopping district which is visited daily by thousands of customers. Leading into this shopping district is a major highway, (highway 100/Manchester Road.) Due to the daily volume being considerably more than the actual population of Warson Woods, one would expect that the Warson Woods disparity index would be higher that the arbitrary figure of one, that has been established.

Agency response

The City of Webster Groves is part of a major metropolitan area whose population travels daily upon our streets. A major interstate highway and several north/south feeder streets are included in our traffic network and are heavily traveled by non-residents in their commute to work and business. In addition, Webster Groves has several shopping and recreational areas that are heavily patronized by a large number of non-residents. This transient population is well documented in that the overwhelming majority of traffic warnings and citations are in fact issued to non-residents. Consequently, any statistical model wherein the resident population of the City of Webster Groves is the sole population used for analysis is seriously flawed.

Agency response

Wentzville has two major Interstate Highways traversing its community. Interstate 70 and Interstate40/61 (64) are heavily traveled and provide a transit population driving, working and shopping within the community. Also, within the city limits are two major employers, the General Motors Wentzville Truck Plant employing 2,695 people consisting of 853 minorities, and the Verizon Communications Company, which is a major employer hosting a large percentage of minority workers. Several other smaller companies with minority employee populations operate within the city and add considerably to the traffic population totals. Blvd style feeder roads such as the Wentzville Parkway, state Route A, Pitman Avenue and other local roads such as state route Z and Mexico Road provide high traffic volumes and traffic violation offenders which demand a considerable police traffic safety response.
